Comprehensive monitoring and alerts

Allstate Identity Protection's monitoring system analyzes and detects high-risk activity and sends alerts at the earliest sign of fraud. That's how we help members minimize risk, damage, and stress with prevention and rapid restoration.

NEW Identity restoration support

Use our in-portal conveniences like one-on-one personal coaching, Identity Fraud Finder, and an online scheduler and specialist chat to always have support during open restoration cases.

Dark web monitoring

We go beyond simply scanning for your information online. We utilize bots and human intelligence operatives together to scour closed hacker forums for members' compromised credentials as well as personal information. We alert members whenever compromised data is found, including:

- Social Security numbers
- Email addresses
- Usernames and passwords
- Credit and debit card numbers
- Government and medical ID numbers
- IP addresses
- Gamer credentials

Financial transaction monitoring

Members can set alerts to trigger from sources including bank accounts, credit and debit cards, account thresholds, 401(k)s, and other investment accounts to help take control of their finances.

High-risk transaction monitoring

Even non-credit-based activity can indicate fraud, so we send alerts for transactions like wire transfers and electronic document signatures matching member information.

Credit monitoring and alerts

Members can set alerts for transactions like new credit inquiries, accounts placed in collections, newly opened accounts, and bankruptcy filings plus monitor reporting for one bureau credit with Pro or tri-bureau with Pro+.

Credit assistance

Should a member's credit monitoring trigger an alert, our in-house team of experts will help freeze files with all major credit bureaus.

Social media account takeover monitoring

Members can add social media accounts for themselves and family members to be notified of suspicious activity that may indicate hacking or an account takeover.
